

WANT SOLVENCY?

TAX

the WEALTH

OF CORPORATIONS &
THE TOP 5%

Why are millionaires paying a lower percentage of taxes than 80% of Americans while being able to cause budget deficits with their greed?

Dear _____,

Your Deficit Commission Recommendations were biased toward the desires of the top 1% of income earners. I urge you to advocate the following rational solutions Ignored by the Commission:

- 1)** Eliminating the income ceiling on Social Security taxes creates a permanently solvent Social Security.
- 2)** Cutting the Defense Department in half would close out all foreign wars would increase tax revenues for peaceful uses and eliminate the deficit.
- 3)** Returning income taxes to the rate tables of 1980 would allow tax breaks for everyone except the top 5% and would eliminate future deficits. **4)** Single Payer Health Care will lower health care costs by more than 25%. **5)** Modernization of the IRS, elimination of tax loopholes and active pursuit of the top 5% income tax cheats will increase Income Tax Revenues by 20%. **6)** A microtax on stocks, bonds and derivatives would raise over \$100 billion a year. **7)** Re-regulating banks and forcing them to re-negotiate bad home loans will prevent financial disaster for millions of Americans. **8) Tax wealth.**

Sincerely,
