Let's face it. In America money has been declared God and Ruler. Profit reigns king over truth and the people's common good. As long as the Profit Monsters are in control you will continue to be fed illusions that perpetuate the US Corporate Empire that wages war, toxicity, human rights and labor vioalctions, subsidies for corporations and the wealthy, and make you pay for it. They will continue to be salesmans for: coal; nuclear; big agriculture over urban gardens and local farms; stripping labor rights so corporations can squeeze more profits; war for oil and coporate empire over poorer nations; bankers and financial sector subsidized profits; meanwhile stripping the people's infrastructure supports, deny us free residential solar, free public transportation, free schools, single payer health care and verifiable voting.
