Where's Our Pirate Analog TV?

**Analog broadcasts go silent...the lies, propaganda, myth and fantasy world stops June 12, 2009. They are now feeding you what they want you to hear. TV, under the elites control, attempts to condition us to accept violence and war; to think peacefulness is cowardly; to disbelieve climate change is happening; to rationalize war for their empire; to accept death and suffering for anyone but themselves; that lifestyles of the rich are the norm and to accept the fantasy, that we all, can live this fantasy too; and most of all, to keep away from you, at all cost, accurate news of events worldwide that makes it clear their illegal campaign for empire and profit must be stopped.**

**Take this opportunity to disconnect permanently and turn on your internet connection to watch free open source news and arts media created by real people for real democracy and real freedom. Then protect your internet from the corporations who want to rob and deceive you so they can con you into destructive consumerism. It's up to us all to fight the power!**
